EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and or additions be unacceptable to the applicants, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

17. (Three Times Amended) A [video presentation] system, comprising:

first frame data in a memory in a computer system, the first frame data representing a first video frame, the first frame data comprising a plurality of elements, each element corresponding to a group of pixels;

second frame data in the memory in the computer system, the second frame data representing a second video frame, the second frame data comprising a plurality of elements, each element corresponding to a group of pixels; and

a module for generating intermediate frame data representing an intermediate video frame between the first and second video frames, the intermediate frame data based upon information from the first and second frame data, the second frame comprising a plurality of elements, the intermediate video frame representing at least one selected element at a position intermediate to respective positions whereat the selected element is represented by the first video frame and the second video frame, and [wherein] filtering at least a portion of the intermediate video frame [has been filtered] in accordance with a determined filter strength so as to reduce visible discontinuities between elements.

18. (Amended) The [video presentation] system of Claim 17, wherein each of the elements is a macroblock quadrant having a plurality of rows and columns of pixels, each of the pixels

having an associated intensity value.

19. (Amended) The [video presentation] system of Claim 18, wherein the intermediate video frame was filtered by a filtering process comprising the steps of:

- (i) selecting at least one pixel within a selected macroblock quadrant;
- (ii) determining the average of the pixel intensity of one or more proximately positioned pixels with respect to the at least one pixel; and
- (iii) associating the determined average pixel intensity with the at least one pixel.

20. (Amended) The [video presentation] system of Claim 19, wherein the [video presentation] intermediate video frame was additionally filtered by the steps (i), (ii), and (iii) with respect to each of the pixels within the selected macroblock quadrant except the bottom-most row of pixels and the right-most column of pixels.

21. (Amended) The [video presentation] system of Claim 19, wherein the proximately positioned pixels include two bordering pixels, the first bordering pixels being positioned above the at least one pixel, the second bordering pixel being positioned below the at least one pixel.

22. (Amended) The [video presentation] system of Claim 19, wherein the proximately positioned pixels include two bordering pixels, the first bordering pixel being positioned to the right of the at least one pixel, the second bordering pixel being positioned to the left of the at least one pixel.

23. (Amended) A system for generating video frames, the system comprising:

a processor;

a memory;

a decoder running on said processor, said decoder outputting to said memory first digital data representing a first film frame comprising elements, each element comprising a plurality of

pixels, said decoder outputting to said memory second digital data representing a second film frame comprising elements, each element comprising a plurality of pixels; and

a frame generator running on said processor, the frame generator inputting said first digital data and said second digital data, the frame generator outputting to said memory intermediate digital data representing an intermediate film frame based upon [information] elements within said first [and] or second digital data, said intermediate digital data including identified groups of pixels, wherein at least two elements in the interpolated frame are in a different sequence from the elements in the first or second frame, said frame generator reducing visible discontinuities near the perimeters of [at least one of the groups of pixels included in said intermediate digital data] the two elements in the interpolated frame.

55. (Amended) In a computer system having a memory, a method of generating video frames comprising:

receiving, via a network, in the memory first data representing a first video frame, the first data comprising a plurality of elements relating to a group of pixels;

receiving, via a network, in the memory second data representing a second video frame, the second data comprising a plurality of elements relating to a group of pixels;

decoding the first video frame and second video frame;

subsequent to decoding, generating third data representing at least one video frame based upon [information] elements from the first [and/]or second data, the third data comprising a plurality of elements having visible discontinuity between adjacent elements, wherein at least two elements in the interpolated frame are in a different sequence from the elements in the first or second frame; and

filtering at least a portion of the generated third data by reducing visible discontinuity

between adjacent elements in the generated third data.

45. (Amended) The [video presentation] system of Claim 17, wherein the computer system includes a display.

67. (Amended) The [video presentation] system of Claim 17, wherein the filter strength is based upon the differences of motion vectors of adjacent groups.

68. (Amended) The [video presentation] system of Claim 17, wherein the filter strength relates to the number of pixels from the edge of the macroblocks that are to be filtered.

Authorization for this examiner's amendment was given in a personal interview with applicant representative Eric Nelson of Knobbe Martens Olson & Bear LLP on 9 October 2003.

Notice of Fee Increase on October 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on October 1, 2003. See Revision of Patent Fees for Fiscal Year 2004; Final Rule, 68 Fed. Reg. 41532, 41533, 41534 (July 14, 2003).

The current fee schedule is accessible from (<http://www.uspto.gov/main/howtofees.htm>).

If the fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due" but not the correct amount in view of the fee increase, a "Notice of Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice of Pay Balance of Issue Fee," if the response to the Notice of Allowance is to be filed on or after October 1, 2003 (or mailed with a certificate of mailing on or after October 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously-paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Effective October 1, 2003, 37 CFR 1.18 is amended by revising paragraphs (a) through (c) to read as set forth below.

Section 1.18 Patent post allowance (including issue) fees.

- (a) Issue fee for issuing each original or reissue patent, except a design or plant patent:
 - By a small entity (Sec. 1.27(a))..... \$665.00
 - By other than a small entity..... \$1,330.00
- (b) Issue fee for issuing a design patent:
 - By a small entity (Sec. 1.27(a))..... \$240.00
 - By other than a small entity..... \$480.00
- (c) Issue fee for issuing a plant patent:
 - By a small entity (Sec. 1.27(a))..... \$320.00
 - By other than a small entity..... \$640.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.
